Designer: Madison
Director: Julianys

Initial Build Notes:

Landing
- Add more novelas to have the effect of the carousel at a bigger screen size
- Minimize the big telenovela and move it to the top of the screen
- Make "home" and "history" more minimized and put to the corner of the screen on a long bar at the top (idk if that has a specific name lol)
- Work on the responsive aspect of the section titles so they work with the screen size
